I'm currently enrolled in a full-stack UCLA coding bootcamp. I'm an aspiring developer, ultimately a software-engineer, who will only reach for the stars.

## Projects

---

### 22 Modules | UCLA

Full-Stack-Dev

- During my time in my bootcamp, I will have completed 22 different modules that exercise a variety of languages.
- Throughout these projects you'll see databases, such as SQL, front, back, middleware and much more put to use.

### Projects | UCLA

Full-Stack-Dev

- Not only did I work on various modules, but I've completed three team oriented projects. These projects build morale, team-support and really learning how to work in a group.

## Professional Experience

---

- **Although I lack professional experience, I'm willing to learn the ins and outs of every language, especially one your company most desires. I'm a hard working individual, well spoken, good alone or with a team and will be a great asset to any company.**

## Education

---

UCLA Extension

2022-2023

Full-stack Coding bootcamp

Yucca Valley High-School

2018-2022

3.9 GPA all throughout

## Skills

HTML, CSS, JavaScript, MySQL, NoSQL, React, Node.js, Express.js, MongoDB, JQuery, Bootstrap, Bulma, TailWind, Promises, middleware, front-end, back-end and much more. I'm willing to not only learn, but become fluent with a programming language your company is needing most.

## Myself

I'm a young middle-eastern/white male who has a passion for computers and programming.
